Thanks, please note New Mexico and 5 other state / local agencies are forming a Task Force to address GKM spill long term monitoring. I am sure they would like to provide input.

Pls keep us updated. So we can show potential activity with NM.

EOC desk officer walked me through dialogue to date re: next steps. Transitioning from

Emergency response to programmatic next steps.

- Admin meeting Saturday with head OEM and ORD. Admin direction: We want to be involved as continuing presence in that area and want to be engaged in watershed planning in that area. Wants us to put something together what we will do with existing resources to help the states going forward.

- Follow-up meeting today w/ OEM, ORD, Dana Tullis and Ken from OW. Ideas for next steps:

- Develop report on pre and post release conditions in watershed

- Help states developing watershed plans for the area

**ACTION WE NEED TO TAKE WITHIN** Next 48 hours (before next meeting of principals likely to be Wednesday AM)

- Are there any existing watershed plans for area impacted by release. Lynda – can we do GRTS pull? Bert/Sandra are you aware of any watershed plans in areas affected by spill?

- Susan/Dwane: Need to conduct a first range-finding query of STORET what data that may be helpful from spill site down through New Mexico and Navajo nation. EOC will send geospatial coord for spill site.

David Goldbloom-Helzner and Brian Pickard will be our tagteam contacts in EOC for this effort.

Bert – I'll give a call
